SUMMARY

Flutter Developer with 3+ years of experience building high-performance mobile and web applications, including real-time systems and scalable backend architectures. Specialized in Flutter, Firebase, and WebSockets, with hands-on experience delivering live streaming, in-app economy, and admin dashboard solutions. Proven ability to independently own features end-to-end, optimize performance, and ship production-ready applications.

WORK EXPERIENCE

InfiniTech - Flutter Developer | Mobile Applications **August 2023 - Present**

- Built and scaled a **real-time social audio & live streaming platform**, supporting voice rooms, live video, and virtual gifting, serving **high concurrent users with low-latency performance**.
- Integrated and managed **200+ RESTful APIs**, handling authentication, user systems, and in-app purchases, ensuring **secure and scalable data flow across the application**.
- Engineered **low-latency real-time communication using WebSockets**, enabling seamless voice interactions and instant event updates across active sessions
- Integrated **Agora & ZegoCloud SDKs** to deliver **high-quality voice and video streaming**, improving connection stability and user retention
- Enhanced **application performance and memory efficiency**, reducing load times by **~20–25%** and improving UI responsiveness through optimized state management and data handling
- Designed and developed a **Flutter Web admin panel** for moderation, analytics, and system management, **reducing manual operational effort and improving team efficiency**.

Neusoftix - Senior Flutter Developer | Mobile App Developer **March 2025 - August 2026**

- Led architecture and end-to-end development of **7+ production mobile applications**, delivering scalable, secure, and high-performance solutions across multiple domains.
- Designed and implemented **scalable backend systems using Firebase and Supabase**, including authentication, real-time data handling, and serverless business logic.
- Built **reusable service layers and modular architecture**, reducing development time by **~25–30%** across multiple projects.
- Collaborated with cross-functional teams to define requirements, optimize system design, and deliver **production-ready features with high reliability**.

EDUCATION

Bachelor of Science in Computer Engineering **October 2019 - July 2023**
University of Engineering and Technology, Taxila

Intermediate **May 2017 - June 2019**
BISE Rawalpindi

ADDITIONAL INFORMATION

- **Technical Skills:** Flutter (UI development), State Management (Provider, BLoC, GetX), REST API & WebSocket integration, Firebase services, Google APIs, Responsive UI design, Clean Architecture, and scalable code structure.
- **Soft Skills:** Strong problem-solving ability, critical thinking, fast learner, effective team collaboration, and high attention to detail with a focus on delivering quality-driven solutions.
